2nd Annual
Golf for CH.I.L.D.

Monday, September 21, 2009 at Morgan Creek Golf Course

A great day of golfing for a great cause.....

The CH.I.L.D. Foundation is dedicated to raising much needed funds to support research into pediatric Crohn's Disease, Ulcerative Colitis, and liver disorders. These are serious chronic digestive diseases that can afflict children even in their first year of life into adulthood.

Save the Date! We would be pleased to have you join us on September 21st to play golf and help ill children at the same time. We look forward to hearing from you and thank you for your support.

Working For A Cure,

Wayne Nygren
Committee Chair

THE CH.I.L.D. FOUNDATION

(The Foundation for Children with Intestinal and Liver Disorders)

Who Are We?

The CH.I.L.D. Foundation was established in 1995 to fund research for children who are stricken with Crohn's Disease, Ulcerative Colitis, and liver disorders. We are a federally registered organization, and our charitable tax number is BN 89897 4951 RR0001. We are fuelled by dedicated volunteers and have created an unprecedented public awareness, due in large part by donated support from the media and the business community. The CH.I.L.D. Foundation has taken this severely under-funded health issue in children and raised the profile to such an extent that health providers and hospital leaders, as well as the general public, are much more attentive to the needs of these children.

It has been thirteen years since Grace McCarthy, OC, OBC, Lindsay Gordon, and Mary Parsons founded The CH.I.L.D. Foundation. The Foundation has established the *very first* Endowed Chair *in Canada* for Pediatric Gastroenterology Research at the University of British Columbia and the first Endowed Program at B.C.'s Children Hospital.

We have built B.C.'s first research lab on the site of B.C.'s Children's Hospital. It now has eighteen researchers and they are receiving National recognition for their work. We will launch a new initiative this year which employs all the latest technologies such as the Internet and Bio-informatics. A grant from the Government of British Columbia will allow us to initiate a Collaborative Approach to finding a cure for I.B.D. This will be a Canada-wide program. Imagine! All those in clinical and research centres all working together to focus on finding the cure! A first in Canada, this is the way of the future of research.

A total coordinated approach for care from bench research to bedside is envisioned, where young patients have the benefit of a coordinated approach from knowledgeable health care professionals and dedicated research scientists.

What is Crohn's Disease and Ulcerative Colitis?

Children with Inflammatory Bowel Diseases (I.B.D.) such as Ulcerative Colitis, and the more serious Crohn's Disease, suffer unpredictable inflammation and ulceration causing excruciating pain, bloody diarrhea, nausea, vomiting, weight loss or gain, chronic fatigue, and anemia. Children suffering from these disorders are often confined to their homes, miss an inordinate amount of school time, can not participate in sports, often will not venture too far from a bathroom and will be too timid to mention their discomfort to peers or even close friends. Crohn's Disease and Ulcerative Colitis are internal and not contagious, and as such there are not always outwardly visible signs of a handicap. Children can be stricken in their first year of life to adulthood and the pain never ends; they will become adults with the same problems and frequent surgeries.

What is Biliary Atresia?

The most common liver disease in children for which liver transplants are necessary. The Pediatric Gastroenterology team at B.C.'s Children's Hospital is the Canadian Co-ordinating Centre for Biliary Atresia. Research for liver disorders is done in the laboratory we built at B.C.'s Children's Hospital and this unit has played a key role in creating the Canadian Pediatric Hepatitis Research Group.
